

what you should have done if you were a nazarene to win the war should have been saved the juice and the gypsies and had the work [0.391]
you have the soul have had them work for the benefit of the victory [3.424]
a man if he wanted to liquidate the master that's the logical thing to do if you want to win [6.368]
and we assume that hitler wanted to win but that's not a very intelligent assumption why would you assume that [7.221]
exactly a good guy so why should we assume that he was aiming at the good that he was promoting [9.126]
even in his own terms right the glorious everlasting for third right [10.841]
the rule for a thayers and be [11.682]
as uncivilization and music because that's the sort of thing he purported to be interested in well [13.886]
so what do you do with the jews and the gypsies well round up fine in slaves and fling [16.875]
tell them you certainly don't devote a substantial proportion [19.187]
your war resources well you're losing to accelerate the rate at which the [21.072]
extermination is taking place because that's a bit counterproductive [22.575]

unless what you're aiming at is the maximum possible may hem in the shortest period of time [24.276]
what happened as the germans started to lose the war in hitler lose faith in his own ability [26.338]
he believed that the germans had betrayed him with weakness [26.621]
he's perfectly willing to accelerate the rate at which germany was losing the war [28.224]
when hitler and his minions had the choice here's the choice you can [29.541]
your unnecessary demolition of people when the dam war [29.907]
then pick it up afterwards for [30.303]
well you're losing you can just accelerate the man even though it's counterproductive like what they [31.89]
the mahamad so to me there's an old psychoanalytic i think this was derived by you [32.426]
carol someone is doing or why look at that come [32.863]

infer the motivation it produces may him
perhaps it was aiming at me [33.628]
you know you have to use that victim
carefully in someone's irritating you
[35.771]
maybe it's because you're a table and you
should erself out but maybe it's because
[40.739]
the claiming an irritating you and that the
actual motivation so perhaps not but
[41.499]

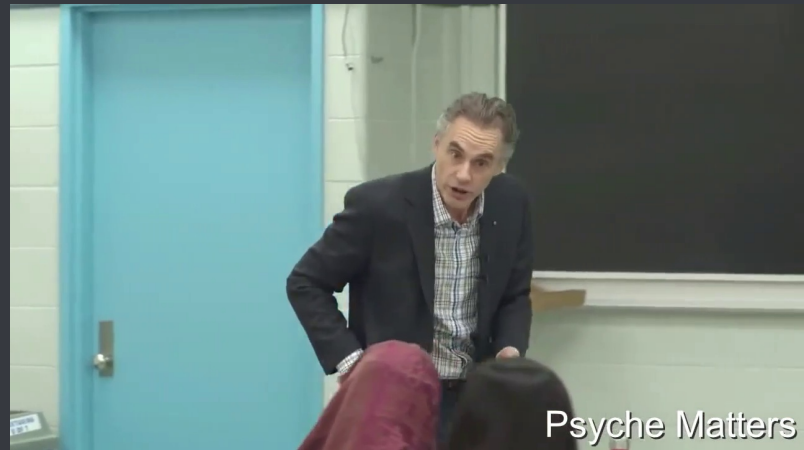

another tool in your analytical armament so
[43.741]
so you see well this is the thing about
warfare that so interesting about bayou can
[44.437]
attribute it to territory elation attribute it to a
war for resources that's what the [45.023]
i would say wretchedly simple minded
economists presume [46.751]
fight over scarce resources is like pay we're
a little bit more sophisticated than that
[47.685]
first of all what resources are you talking
about the bloody in it had nothing they live
[50.777]
well what did they have snow and seal
blubber [52.357]

Psyche Matters

people can live an unbelievably deprived condition and so [53.948]
the idea that there are natural resources that we fight over because there's a shortage of them is a pretty oversimplified view of human being [56.075]

Psyche Matters
